## Delivery Methods

Fast Lane offers several delivery methods.

### ILT - Instructor-Led Classroom Training

ILT sessions are conducted in a physical classroom environment.

### ILO - Instructor-Led Online Training

ILO sessions are conducted via WebEx in a VoIP environment.

### FLEX™ Classroom - Combined ILT & ILO

FLEX Classroom sessions are delivered via ILO and ILT giving you the ultimate flexibility. Choose to attend via the Internet or attend the class in person. Either way, your experience will be equally as effective including all hands-on labs.

### Guaranteed Dates

With Fast Lane's Guaranteed Dates schedule you can book your training with the safety and reassurance that your course will not be cancelled or rescheduled.

### Private Onsite Training

Our private onsite training can be customised to your needs and delivered at your location.

# Authorised Cisco Training

Fast Lane's training offerings are as multifaceted as the diverse Cisco technologies and specialised solutions your company and workforce need.

## Cisco Complete

Fast Lane offers the full range of Cisco training, from entry level to high-end specialised courses. We can ensure you are prepared to master the challenges of Cisco certification and specialisation.

## Cisco Awards

Fast Lane has received several awards from Cisco. The awards include the Cisco Top Relevance Award EMEAR 2012 and the Cisco European Learning Partner of the Year 2009, 2010 and 2011 Awards.

## Cisco Architecture Specialisations

Fast Lane acquired three Cisco Architecture Specialisations: Advanced Borderless Networks, Advanced Collaboration and Advanced Data Center.

## Cisco Sales and Business Development

As a Business Learning Partner (BLP), Fast Lane is especially qualified to create, customise and deliver market leading, Cisco relevant, sales focused authorised Training.

## Expert Instructors

Our Vendor-Certified Instructors have real, hands-on experience in today's challenging business environments. They use this knowledge to create a collaborative learning experience that goes beyond course materials and labs. Whether you are new to the industry, an experienced engineer or a sales person we can help you every step of the way to achieve your training objectives.

## Certified Worldwide

Fast Lane is an authorised CLSP in all 3 of Cisco's geographic regions.

## Advanced Technology Labs

Fast Lane offers an unrivalled training and demo lab environment. Featuring state of the art Cisco equipment and technologies, we convey the knowledge you need to operate complex IT infrastructures.

## Cisco Learning Credits

Cisco Learning Credits are a convenient and efficient way to purchase and manage Cisco authorised training. They enable customers to increase productivity and improve network optimisation while safeguarding training budget and monitoring training expenditures.

## Learning Center

Our online learning center helps you achieve your certification goals quickly and without administrative effort because we act on your behalf, shouldering all the responsibility for managing certification projects.

## Routing & Switching

# Implementing Cisco IP Switching (SWITCH)

**ID** CI-SWITCH **Price** 2.490,00 EUR / 1.985,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Interconnecting Cisco Network Devices 1 (ICND1) and Interconnecting Cisco Network Devices 2 (ICND2) courses

## Course Content

- Analyzing Campus Network Designs
- Implementing VLANs in Campus Networks

- Implementing Spanning Tree
- Implementing Inter-VLAN Routing
- Implementing a Highly Available Network
- Implementing Layer 3 High Availability
- Minimizing Service Loss and Data Theft in a Campus Network
- Accommodating Voice and Video in Campus Networks
- Integrating WLANs into a Campus Network

## Implementing Cisco Catalyst 6500 Series Switches (RSCAT6K)

**ID** CI-RSCAT6K **Price** 2.490,00 EUR / 1.695,00 GBP (excl. VAT) **Duration** 3 Days

### Prerequisites

- Cisco Certified Network Associate (CCNA) level of knowledge

### Course Content

- Cisco Catalyst 6500 Series Switches Architecture: Assessing the Cisco Catalyst 6500 Series Switches; Listing Cisco Catalyst 6500 Series Switch Supervisor Engines; Choosing Cisco Catalyst 6500 Series Switch Line Cards; Characterizing Packet Forwarding in a Cisco Catalyst 6500 Series Switch; Describing Unicast Packet Walks Between Different Line Cards
- Core Technologies on the Cisco Catalyst 6500 Series Switches: Applying

the Virtual Switching System 1440/4T to a Network; Analyzing Multicast on the Cisco Catalyst 6500 Series Switches; Characterizing Identity and Authentication; Introducing Network Virtualization; Describing Data Center Interconnect Using Cisco Catalyst 6500 Series Switches; Planning and Implementing High Availability on Cisco Catalyst 6500 Series Switches

- Cisco Catalyst 6500 Monitoring and Operations: Configuring SPAN, RSPAN and ERSPAN; Configuring NetFlow; Introducing Enhanced Manageability; Deploying Control Plane Policing; Implementing ACL Features; Prioritizing Traffic through the Catalyst 6500 using QoS

# Virtual Switching System VSS 1440/4T (VSS)

**ID** FL-VSS **Price** 1.690,00 EUR (excl. VAT) **Duration** 2 Days

### Prerequisites

- Cisco Certified Network Professional (CCNP) level of knowledge

### Course Content

- Stateful Switchover (SSO) and Non-Stop Forwarding (NSF)
- The Virtual Switching System (VSS) concept
- Deployment in a hierarchical network
- Hard- and Software requirements
- Virtual Switch Link – function and deployment
- Link Management Protocol (LMP)
- Role Resolution Protocol (RRP)
- Migration from Single-Chassis-systems to a VSS system

- Multi-Chassis-EtherChannel (MEC)
- Identification of a Dual-Active state with PAGP+, BFD or Fast Hellos
- Monitor VSS with Syslog and SNMP
- Tuning of VSS and important management commandos
- Identification of potential problems with the implementation and operation of VSS, including prevention and troubleshooting
- Enhanced Fast Software Upgrade
- Application of Modular IOS
- Quad Supervisor-Engine Support
- Operation of Services Modules like ACE or FWSM in a VSS
- Operation of MPLS, IPv6, EEM and NetFlow

# Implementing Cisco IOS Network Security (IINS)

**ID** CI-IINS **Price** 2.490,00 EUR / 1.775,00 GBP (excl. VAT) **Duration** 5 Days

### Prerequisites

- Interconnecting Cisco Network Devices (ICND1, ICND2) courses

### Course Content

- Networking Security Fundamentals: Introducing Networking Security Concepts; Understanding Security Policies Using a Life-Cycle Approach; Building a Security Strategy for Borderless Networks
- Protecting the Network Infrastructure: Introducing Cisco Network Foundation Protection; Protecting the Network Infrastructure Using Cisco Configuration Professional; Securing the Management Plane on Cisco IOS Devices; Configuring AAA on Cisco IOS Devices Using Cisco Secure

- ACS; Securing the Data Plane on Cisco Catalyst Switches; Securing the Data Plane in IPv6 Environments

# Designing for Cisco Internetwork Solutions (DESGN)

**ID** CI-DESGN **Price** 2.390,00 EUR / 1.645,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- CCNA certification or equivalent knowledge
- Implementing Cisco IP Switched Networks (SWITCH) course
- Practical experience with deploying and operating Cisco networks

## Course Content

- Network Design Methodology Overview
  - Understanding the Network Architectures for the Enterprise
  - Identifying Design Requirements
  - Characterizing the Existing Network and Sites
  - Using the Top-Down Approach to Network Design
  - Case Study: ACMC Hospital Network Upgrade
- Structuring and Modularizing the Network
  - Designing the Network Hierarchy
  - Using a Modular Approach in Network Design
  - Supporting Services on Borderless Networks
  - Identifying Network Management Protocols and Features
  - Case Study: ACMC Hospital Network Structure and Modularity
- Designing Basic Campus and Data Center Networks
  - Describing Campus Design Considerations
  - Designing the Enterprise Campus Infrastructure Module
  - Describing Enterprise Data Center Considerations
  - Case Study: ACMC Hospital Network Campus Design
- Designing Remote Connectivity
  - Identifying WAN Technology Considerations
  - Designing the Enterprise WAN
  - Designing the Enterprise Branch
  - Case Study: ACMC Hospital Network WAN Design
- Designing IP Addressing and Selecting Routing Protocols
  - Designing IPv4 Addressing
  - Designing IPv6 Addressing
  - Reviewing Enterprise Routing Protocols
  - Designing a Routing Protocol Deployment
  - Case Study: ACMC Hospital Network IP Addressing and Routing Protocol Design

- Evaluating Security Solutions for the Network
  - Defining Network Security
  - Understanding the Cisco SAFE Approach
  - Selecting Network Security Solutions
  - Case Study: ACMC Hospital Network Security Design
- Identifying Voice Networking Considerations
  - Integrating Voice Architectures
  - Identifying the Requirements of Voice and Video Technologies
  - Case Study: ACMC Hospital Network Voice Transport Considerations
- Identifying Design Considerations for Basic Wireless Networks
  - Introducing the Cisco Unified Wireless Network
  - Wireless Network Controller Technology
  - Designing Wireless Networks using Controllers
  - Case Study: ACMC Hospital Network Unified Wireless Networking Considerations
  - Case Study: Connecting More Hospitals to the ACMC Hospital Network
- Wrap-up

# Designing Cisco Network Service Architectures (ARCH)

**ID** CI-ARCH **Price** 2.390,00 EUR / 1.725,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- CCNA and CCDA knowledge
- Implementing Cisco IP Routing (ROUTE) and Implementing Cisco IP Switched Networks (SWITCH) courses

## Course Content

- Network Architectures for the Enterprise
- Enterprise Campus Network Design
- Advanced Addressing and Routing Design

- Advanced WAN Services Design Considerations
- Enterprise Data Center Design
- E-Commerce Module Design
- Storage Area Network Design Considerations
- Security Services Design
- IPsec and SSL VPN Design
- IP Multicast Design
- Network Management Capabilities with Cisco IOS Software

## Implementing Cisco IOS Telephony & Unified Communications Express (IITUCX)

**ID** CI-IITUCX **Price** 2.590,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

### Prerequisites

- Working knowledge of fundamental terms and concepts of computer networking to include LANs, WANs, and IP switching and routing
- Interconnecting Cisco Network Devices Part 1 (ICND1) course
- Ability to configure and operate Cisco routers and switches

### Course Content

- Cisco Unified Communications System Introduction
- Traditional Telephony Operations
- VoIP Fundamentals
- Cisco Unified Communications Manager Express Implementation
- Cisco Unity Express Implementation

# Implementing Cisco Unified Communications Voice over IP & QoS (CVOICE)

**ID** CI-CVOICE **Price** 2.590,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Working knowledge of fundamental terms and concepts of computer networking including LANs, WANs, and IP switching and routing
- Ability to configure and operate Cisco IOS routers in IP environment at the CCNA level
- Basic knowledge of traditional voice, converged voice, and data networks at the CCNA Voice level

## Course Content

- Introduction to Voice Gateways
  - Understanding Cisco Unified Communications Networks and the Role of Gateways
  - Examining Gateway Call Routing and Call Legs
  - Configuring Gateway Voice Ports
  - Understanding DSP Functionality, Codecs, and Codec Complexity
- VoIP Call Legs
  - Examining VoIP Call Leg Characteristics and VoIP Media Transmission
  - Explaining H.323 Signaling Protocol
  - Explaining SIP Signaling Protocol
  - Explaining MGCP Signaling Protocol
  - Describing Requirements for VoIP Call Legs
  - Configuring VoIP Call Legs
- Cisco Unified Communications Manager Express Endpoints Implementation
  - Introducing Cisco Unified Communications Manager Express
  - Examining Cisco Unified Communications Manager Express Endpoint Requirements
  - Configuring Cisco Unified Communications Manager Express Endpoints

- Dial Plan Implementation
  - Introducing Call Routing
  - Understanding Dial Plans
  - Describing Digit Manipulation
  - Configuring Path Selection
  - Configuring Calling Privileges
- Gatekeeper and Cisco Unified Border Element Implementation
  - Understanding Gatekeepers
  - Examining Cisco Unified Border Element
- Quality of Service
  - Introducing QoS
  - Understanding QoS Mechanisms and Models
  - Explaining Classification, Marking, and Link Efficiency Mechanisms
  - Managing Congestion and Rate Limiting
  - Understanding Cisco AutoQoS

# Implementing Cisco Unified Communications Manager Part 2 (CIPT2)

**ID** CI-CIPT2 **Price** 2.690,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Working knowledge of converged voice and data networks
- Working knowledge of the MGCP, SIP, and H.323 protocols and their implementation on Cisco IOS gateways
- Ability to configure and operate Cisco routers and switches
- Ability to configure and operate Cisco Unified Communications Manager in a single-site environment

## Course Content

- Multisite Deployment Implementation
  - Identifying Issues in a Multisite Deployment
  - Identifying Multisite Deployment Solutions
  - Implementing Multisite Connections
  - Implementing a Dial Plan for International Multisite Deployments
- Centralized Call-Processing Redundancy Implementation
  - Examining Remote Site Redundancy Options
  - Implementing SRST and MGCP fallback
  - Implementing Cisco Unified Communications Manager Express in SRST Mode
- Bandwidth Management and CAC Implementation
  - Managing Bandwidth
  - Implementing CAC
- Implementation of Features and Applications for Multisite Deployments
  - Implementing Device Mobility
  - Implementing Cisco Extension Mobility

## Cisco Data Center 3.0 Architectural Overview (DCAO)

**ID** FL-DCAO **Price** 790,00 EUR (excl. VAT) **Duration** 1 Day

### Prerequisites

- An understanding of Data Center LAN and SAN architectures would be an advantage

### Course Content

- Data Center Architecture
- Nexus 7000 - Core Switch
- Nexus 5000 - Access Layer Switch
- Nexus 2000 - Fabric Extender (FEX)
- Nexus 4000 - FCoE Blade Switch
- Nexus 1000V
- Unified Computing System
- Case Study - Building a Data Center with Nexus and UCS

## Cisco Nexus Overview Workshop (CNOW)

**ID** FL-CNOW **Price** 790,00 EUR (excl. VAT) **Duration** 1 Day

### Prerequisites

- CCNA Certification or equivalent knowledge

### Course Content

- Cisco Nexus Family Overview
- The Nexus 5000 Series Switch: Data Center challenges; I/O Consolidation; Nexus 5000 Architecture Overview; FCoE Server Adapters; Management of the Nexus 5000
- The Nexus 2000 Fabric Extender: Architecture of the Access Switch; Nexus 2000 Access Layer Design
- The Nexus 1000V Virtual Switch: Overview of the Virtual Environment; VN-Link; VM Provisioning
- The Nexus 7000 Core Switch: Data Center Core Requirements; Nexus 7000 Deployment, Nexus 7000 Integrated Core
- Virtual Data Center Architecture: Data Center Network Overview; Access Layer Designs

# Introducing Cisco Data Center Networking (DCICN)

**ID** CI-DCICN **Price** 2.490,00 EUR / 1.895,00 GBP (excl. VAT) **Duration** 4 Days

## Prerequisites

- Basic computer literacy
- Basic knowledge of Microsoft Windows operating systems
- Basic Internet usage skills

## Course Content

- Simple Network Design
  - Understanding the Functions of Networking
  - Understanding the Host-to-Host Communications Model
  - Describing Ethernet Connections
  - Describing Ethernet Communications Standards
  - Describing OSI Network Layer Addressing
  - Describing the TCP/IP Transport Layer
  - Describing the Packet Delivery Process
- Switched Network Implementation
  - Describing Switching
  - Describing the Packet Delivery Process
  - Describing Cisco NX-OS Software
  - Operating Cisco NX-OS Software
  - Implementing VLANs and Trunks
  - Building a Redundant Switched Topology
- IP Addressing
  - Describing an IP Addressing Scheme
  - Transitioning to IPv6
- Routing on the Cisco Nexus Switch
  - Exploring the Packet Delivery Process
  - Exploring the Routing Process on Cisco Nexus Switches
  - Exploring Routing Protocols on Cisco Nexus Switches
  - Exploring ACLs on Cisco Nexus Switches

# Introducing Cisco Data Center Technologies (DCICT)

**ID** CI-DCICT **Price** 2.590,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Introducing Cisco Data Centers Networking (DCICN) or equivalent knowledge

## Course Content

- Cisco Data Center Network Services
  - Examining Functional Layers of the Data Center
  - Reviewing the Cisco Nexus Product Family
  - Reviewing the Cisco MDS Product Family
  - Monitoring the Cisco Nexus 7000 and 5000 Series Switches
  - Describing vPCs and Cisco FabricPath in the Data Center
  - Using OTV on Cisco Nexus 7000 Series Switches
- Cisco Data Center Virtualization
  - Virtualizing Network Devices
  - Virtualizing Storage
  - Virtualizing Server Solutions
  - Using the Cisco Nexus 1000V Series Switch
  - Verifying Setup and Operation of the Cisco Nexus 1000V Series Switch
- Cisco Data Center Storage Networking
  - Comparing Storage-Connectivity Options in the Data Center
  - Describing Fibre Channel Storage Networking
  - Verifying Fibre Channel Communications on Cisco MDS 9000 Series Multilayer Switches
- Cisco Data Center Unified Fabric
  - Describing DCB

- Identifying Connectivity Options for FCoE on the Cisco Nexus 5000 Series Switch
- Describing Enhanced FCoE Scalability with Cisco Nexus 2232 10GE Fabric Extenders
- Cisco UCS
  - Describing the Cisco UCS B-Series Product Family
  - Describing the Cisco UCS C-Series Product Family
  - Connecting Cisco UCS B-Series Blade Servers
  - Setting up an Initial Cisco UCS B-Series Cluster
  - Describing Cisco UCS Manager Operations
  - Describing Cisco UCS Manager Pools, Policies, Templates, and Service Profiles

# Data Center Unified Computing Implementation (DCUCI)

**ID** CI-DCUCI **Price** 2.990,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- DCUCI Online Pre-Learning: Delegates will receive access to two e-learning courses (10 hours and 6 hours) prior to course attendance.
- Implementing Cisco Storage Networking Solutions (ICSNS) and Implementing Cisco Data Center Unified Fabric (DCUFI) courses

## Course Content

- Brief Survey of Cisco Data Center Unified Computing Implementation E-Learning
- Installation of the Cisco Unified Computing System C-Series: Upgrading Firmware Components in the Cisco Unified Computing System C-Series; References to Additional Installation Topics in E-Learning
- Configure Cisco Integrated Management Controller: Configuring Cisco Server Integrated Management Controller; Provision Server Hardware with Cisco Integrated Management Controller
- Cisco Unified Computing System B-Series Hardware and Management: Describing Cisco UCS B-Series Hardware Components; Assembling B-Series Architecture & Features; Installing Cisco UCS B-Series Hardware
- Cisco Unified Computing System Connectivity Configuration and

Management: Configuring Cisco Unified Computing System B-Series Physical Connectivity; Exploring the Unified Computing System B-Series User Interfaces; Configuring Compute Node LAN Connectivity; Distinguishing Compute Node SAN Connectivity

- Server Resources Implementation: Creating Identity and Resource Pools; Creating Service Profiles; Creating Service Profile Templates and Cloning Service Profiles; Managing Service Profiles
- Networking in a Virtual Server Environment: Introducing the Cisco Nexus 1000V; Introducing VMware Ethernet Networking; Characterizing Cisco Nexus 1000V Architecture; Installing and Configuring the Cisco Nexus 1000V; Configuring Basic Cisco Nexus 1000V Networking; Configuring the M81KR Virtualization Adapter for VMware Pass-Thru Switching
- Cisco Unified Computing System Management and Maintenance: Implementing Cisco Unified Computing System Startup and Shutdown Procedures; Characterizing Role-Based Access Control; Backing-up and Restoring the Cisco UCS Manager Database; Managing High Availability; Monitoring System Events; Managing and Upgrading Cisco UCS B-Series Firmware

# Data Center Unified Computing Design (DCUCD)

**ID** CI-DCUCD **Price** 2.390,00 EUR (excl. VAT) **Duration** 4 Days

## Prerequisites

- Designing for Cisco Internetwork Solutions (DESIGN), Designing Cisco Data Center Unified Fabric (DCUFD) and Designing Cisco Storage Networking Solutions (DCSNS) courses
- Linux or Windows system administration familiarity
- Introduction to Virtualization (Virt101EL) precourse online training

## Course Content

- Cisco Unified Computing System Solution
  - Analyzing Data Center Computing Solutions
  - Identifying a Cisco Unified Computing System Solution
  - Evaluating Server Deployment Options
  - Defining a Cisco Unified Computing System Solution Design
- Assess Computing Solution Requirements
  - Analyzing Performance Characteristics
  - Employing Data Center Reconnaissance and Analysis Tools
- Design Cisco Unified Computing System Solution
  - Evaluating Cisco UCS C-Series Architecture
  - Sizing the Cisco UCS C-Series Solution
  - Evaluating Cisco UCS B-Series Architecture
  - Sizing the Cisco UCS B-Series Solution
- Planning Physical Deployment
- Examining the Cisco UCS Network and Storage
- Designing the Cisco UCS Network and Storage
- Design Server Deployment
  - Designing Cisco UCS Server Deployment Model
- Design Cisco UCS Solution Management
  - Examining Cisco UCS Solution Management
  - Designing Cisco UCS Solution Management
- Design Advanced Server Deployment
  - Evaluating Cisco UCS Deployment with Microsoft Hyper-V
  - Evaluating Cisco UCS Integration with VMware vSphere
  - Evaluating Cisco UCS and Cisco Nexus 1000V Integration with VMware vSphere
- Evaluate Cisco Unified Computing System Solutions
  - Evaluating Solution Design
  - Determining Solution ROI and TCO
- Plan Migration to Cisco Unified Computing System Solution
  - Designing a Migration Plan

# Troubleshooting Cisco Data Center Unified Computing (DCUCT)

**ID** CI-DCUCT **Price** 2.290,00 EUR / 1.895,00 GBP (excl. VAT) **Duration** 3 Days

## Prerequisites

- Knowledge covered by the Introducing Cisco Data Center Technologies (DCICT) course
- Knowledge covered by the Implementing Cisco Data Center Unified Computing (DCUCI) course
- Familiarity with server virtualization (for example, VMware vSphere and Microsoft Hyper-V)
- Familiarity with administration of common operating systems (for example, Linux and Windows)

## Course Content

- Cisco UCS B-Series Troubleshooting
  - Troubleshooting Cisco UCS B-Series Architecture and Initialization
  - Troubleshooting Cisco UCS B-Series Configuration
  - Troubleshooting Cisco UCS B-Series Operation
  - Troubleshooting Cisco UCS B-Series LAN and SAN Connectivity
  - Troubleshooting and Upgrading Cisco UCS Manager
  - Troubleshooting Cisco UCS B-Series Hardware
- Cisco UCS C-Series Troubleshooting
  - Cisco UCS C-Series Architecture and Configuration
  - Troubleshooting Cisco UCS C-Series Hardware and Firmware
  - Troubleshooting Cisco UCS C-Series LAN and SAN Connectivity
  - Troubleshooting Locally Attached Storage
  - Troubleshooting Operating System-Related Issues
- Cisco UCS C-Series Integration Troubleshooting
  - Integrating Cisco UCS C-Series and Cisco UCS Manager
  - Troubleshooting Cisco UCS C-Series and Cisco UCS Manager Integration

- Recommended CCNA Certification
- Good understanding of the Fibre Channel protocol and the SAN environment
- Implementing Cisco StorageNetwork Solutions (ICSNS) class

## Course Content

- Cisco Nexus Product Overview: Identifying the Cisco Data Center Business Advantage Architecture; Identifying Cisco Nexus Products; Identifying the Cisco Unified Fabric Solution; Integrating Services
- Cisco Nexus Switch Feature Configuration: Configuring Virtual Device Contexts; Configuring Layer 2 Switching Features; Configuring Port Channels; Configuring Layer 3 Switching Features; Configuring IP Multicast
- Cisco Nexus Switch Advanced Feature Configuration: Configuring Security Features; Understanding Overlay Transport Virtualization; Implementing Quality of Service
- Cisco Nexus Series Switch Management: Using the Connectivity

Management Processor; Configuring User Management; Understanding System Management

- Redundancy on Cisco Nexus Switches: Understanding High Availability and Redundancy; Implementing Cisco FabricPath
- Fibre Channel over Ethernet: Understanding Fibre Channel Protocol; Understanding FCoE Protocol; Identifying Data Center Bridging Ethernet Enhancements
- Fibre Channel over Ethernet Configuration: Implementing FCoE; Configuring SAN Switching Features; Configuring NPV Mode; Using SAN Management Tools
- Troubleshooting on Cisco Nexus Switches: Troubleshooting the Data Center Infrastructure; Troubleshooting Tools and Resources

# Designing Cisco Data Center Unified Fabric (DCUFD)

**ID** CI-DCUFD **Price** 2.990,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

### Prerequisites

- CCNA Data Center certification or equivalent knowledge
- Knowledge that is covered in the Cisco Nexus product family courses
- Knowledge that is covered in the Designing for Cisco Internetwork Solutions (DESGN) and Designing Cisco Storage Networking Solutions (DCSNS) courses

### Course Content

- Cisco Data Center Solutions
  - Identifying Data Center
  - Identifying Cisco Data Center Solution
  - Defining Cisco Data Center Solution Design
- Data Center Technologies
  - Designing Layer 2 and Layer 3 Switching
  - Virtualizing Data Center Components
  - Designing Layer 2 Multi-Pathing Technologies
- Data Center Topologies
  - Designing Data Center Core Layer Network
  - Designing Data Center Aggregation Layer
  - Designing Data Center Access Layer
  - Designing Data Center Virtualized Access Layer
  - Designing High Availability

- Designing Data Center Interconnects
- Data Center Storage
  - Introducing Storage Area Networking
  - Designing SAN
  - Designing Unified Fabric
  - Designing SAN Services
- Data Center Security
  - Designing Data Center Application Security
  - Designing Link Security Technologies and Device Hardening
  - Designing Storage Security
- Data Center Application Services
  - Designing Data Center Application Architecture
  - Designing Application Services
  - Designing Global Load Balancing
- Data Center Management
  - Designing Data Center Management Solutions

# Troubleshooting Cisco Data Center Unified Fabric (DCUFT)

**ID** CI-DCUFT **Price** 2.290,00 EUR / 1.895,00 GBP (excl. VAT) **Duration** 3 Days

## Prerequisites

- Implementing Cisco Data Center Unified Fabric (DCUFI) course or equivalent experience
- Recommended attendance of Nexus 7000, 5000 and MDS product courses
- Recommended CCNA or CCNP certification
- Recommended attendance of a Fibre Channel Protocol class or equivalent experience
- Implementing Cisco Storage Network Solutions (ICSNS) course or equivalent experience

## Course Content

- Tools and Methodologies Troubleshooting
  - Understanding CLI Troubleshooting Tools
  - Understanding Cisco DCNM Troubleshooting Tools
- Layer 2 Issues Troubleshooting
  - Troubleshooting VLANs and Private VLANs
  - Troubleshooting Port Channels and Virtual Port Channels
  - Troubleshooting Cisco FabricPath
  - Troubleshooting OTV
- SAN Switching Issues Troubleshooting
  - Troubleshooting Fibre Channel Interfaces
  - Troubleshooting Fibre Channel Fabric Service
  - Troubleshooting NPV Mode
- Fibre Channel over Ethernet Troubleshooting
  - Troubleshooting FCoE
  - Troubleshooting DCBx

- Platform Specific Issues Troubleshooting
  - Troubleshooting the Cisco Nexus 7000
  - Troubleshooting the Cisco Nexus 5000 and 5500 Switches
  - Troubleshooting the Cisco Nexus 2000 Fabric Extender
  - Troubleshooting the Cisco MDS Switch

## Prerequisites

- Good understanding of networking protocols
- Recommended CCNA Certification
- Good understanding of the VMware environment
- Recommended attendance of the VMware vSphere: Install, Configure, Manage (VICM) class or equivalent knowledge

## Course Content

- VMware Networking Overview
  - Reviewing the Virtual Infrastructure
  - Networking in the VMware Infrastructure
  - Configuring VMware Switching
- Cisco Nexus 1000V Series Switch Installation
  - Reviewing the Cisco Nexus 1000V Product
  - Reviewing the Cisco Nexus 1010 Virtual Services Appliance and Virtual Service Blades
  - Installing the Virtual Supervisor and Virtual Ethernet Modules
- Cisco Nexus 1000V Feature Configuration
  - Configuring Port Profiles
  - Configuring Security Features
  - Configuring Quality of Service
- Cisco Nexus 1000V Switch Management
  - Configuring Management Features
  - Configuring System Management Features
- Troubleshooting the Cisco Nexus 1000V Switch
  - Using Basic Troubleshooting Tools
  - Troubleshooting Modules
  - Troubleshooting Ports and Port Profiles

# Implementing the Cisco Nexus 5000 & 2000 (DCNX5K)

**ID** CI-DCNX5K **Price** 3.290,00 EUR / 2.085,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Good understanding of networking protocols
- Recommended CCNA Certification
- Good understanding of the Fibre Channel protocol and the SAN environment
- Recommended attendance of a Fibre Channel Protocol class or equivalent experience
- Recommended attendance of the Implementing Cisco Storage Networking Solutions (ICSNS) class or equivalent experience

## Course Content

- Cisco Nexus 5000 Series Switches Product Overview
  - Introducing the Cisco Nexus 5000 Series Switches
  - Understanding the Cisco Nexus Family System Architecture
  - Understanding the Cisco NX-OS Software Architecture
  - Cisco Nexus 5000 and 2000 Hardware Installation
- Network Feature Configuration on the Cisco Nexus 5000 Series Switches
  - Configuring Layer 2 Switching Features
  - Configuring Cisco Nexus 2000 Series Fabric Extenders
  - Configuring Ethernet Port Channels and Virtual Port Channels

- Configuring Quality of Service
- Configuring Cisco FabricPath
- Troubleshooting Layer 2 Switching
- Fibre Channel over Ethernet
  - Understanding the Fibre Channel Protocol
  - System Management on the Cisco Nexus 5000 switch
  - Identifying IEEE Data Center Bridging Enhancements
- Configuring FCoE
- Troubleshooting FCoE
- Configuring SAN Switching Features
- SAN Management Tools
- Implementing Cisco NPV Mode and NPV
- Troubleshooting SAN Switching
- System Management Features of the Cisco Nexus 5000 Series Switches
  - Configuring Security Features
  - Configuring System Management
  - Understanding Cisco Nexus High Availability

# Implementing the Cisco Nexus 7000 (DCNX7K)

ID CI-DCNX7K Price 3.290,00 EUR / 2.085,00 GBP (excl. VAT) Duration 5 Days

## Prerequisites

- Good understanding of networking protocols, routing & switching
- Recommended CCNA Certification
- Recommended attendance of Implementing Cisco IP Routing (ROUTE) and Implementing Cisco IP Switched Networks (SWITCH)

## Course Content

- Describing Cisco Nexus 7000 Series Switches
  - Describing the Cisco Nexus 7000 Switch
  - Describing Cisco Nexus 7000 Series Switch Features in General
  - Describing the Cisco Nexus 7000 Switch Deployment Models
- Cisco Nexus 7000 Series Switch Hardware Architecture, Device Installation, and Administration Features
  - Describing Cisco Nexus 7000 Series Switch Hardware Architecture
  - Installing Cisco Nexus 7000 Series Switches
  - Configuring Device Administration and Management Features
  - Using the Troubleshooting Process and Tools
- Cisco Nexus 7000 Series Switch Software Architecture and Features
  - Describing Cisco NX-OS Software
  - Configuring Virtual Device Contexts on Cisco Nexus 7000 Series Switches

- Configuring Layer 2 Switching Features
- Configuring Port Channels
- Configuring the Cisco Nexus 7000 Series Switch with the Cisco Nexus 2000 Series Fabric Extender
- Configuring Cisco FabricPath
- Configuring Layer 3 Switching Features
- Troubleshooting Layer 2 and Layer 3
- Configuring MPLS
- Configuring Cisco OTV
- Configuring Locator/ID Separation Protocol
- Configuring FCoE
- Configuring Security Features
- Configuring QoS
- Troubleshooting Memory and Packet Flow Issues

# Implementing Cisco Advanced Storage Networking Solutions (IASNS)

**ID** CI-IASNS **Price** 2.990,00 EUR / 2.085,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Implementing Cisco Storage Networking Solutions (ICSNS)

## Course Content

- Building Enterprise SAN Fabrics
  - Implementing Inter-VSAN Routing
  - Tuning Fabric Performance
  - Implementing Data Mobility Manager
  - Building Heterogeneous Fabrics
  - Fibre Channel over Ethernet (FCoE)
- Implementing Management and Security Services
  - Implementing the Management Infrastructure
  - Monitoring Health and Performance
  - Configuring AAA Services
  - Implementing Fabric and Port Security
  - Implementing Cisco Storage Media Encryption
- Advanced Troubleshooting
  - Basic Troubleshooting Tools Review
  - Capturing Protocol Traces
  - Using Physical Port Diagnostics
  - Troubleshooting Combined Generation line cards and hardware components
  - Troubleshooting FX Port Issues
  - Troubleshoot the Data Path

- Troubleshooting Fabric Manager and Device Manager
- iSCSI Protocol Overview
  - iSCSI Protocol Overview
  - Basic iSCSI Configuration
  - iSCSI Implementation Options
  - iSLB

# Designing Cisco Storage Networking Solutions (DCSNS)

**ID** CI-DCSNS **Price** 2.890,00 EUR / 2.085,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Basic understanding of data storage hardware components and protocols, including SCSI and Fibre Channel
- CCNA certification recommended

## Course Content

- MDS 9000 Platform Overview
  - Introducing MDS 9000 Platform Components
  - System Architecture
  - Cisco Nexus 5000 Overview
  - Cisco Unified Computing System Overview
  - Using Intelligent Fabric Services
  - Software Packages and Licensing
  - Implementing Integrated Management
  - Initial Switch Configuration
- Designing SAN Fabrics
  - SAN Design Overview
  - Designing n-tier Application Architectures
  - Designing Host Connectivity
  - Designing Storage Connectivity
  - Building the SAN
  - Designing Redundant Fabrics
  - SAN Migration and Interoperability
  - Data Center Consolidation and Virtualization
- Traffic Engineering
- SAN Design using Unified I/O
- Designing SAN Extension Solutions
  - Disaster Recovery and Business Continuity
  - SAN Extension Connectivity with Optical Networks
  - SAN Extension Connectivity with FCIP
  - Improving Performance and Availability
- SAN Security
  - Securing the SAN Fabric
  - Storage Security Features

# Multivendor Data Center Training

As an authorised training partner of Cisco, NetApp, and VMware, we are uniquely positioned to help you gain the cross vendor knowledge and skills you desire. We've combined the best sales and technical information from these three leading companies and added the key information developed by our outstanding team of certified instructors from around the globe to create a powerful curriculum to help you sell, prepare for and deploy the most important Data Center technologies.

## Sales Training

The primary goal of our Sales Training is on covering all the technology at a level of detail that supports your efforts to understand, position, and explain these complex technologies.

FlexPod for Account Managers (FPAM) 1 Day	VXI/VDI for Account Managers (VXAM) 2 Days	VXI/VDI for System Engineers (VXSE) 2 Days

## Technical Training

Our technical training curriculum is complex and technically deep. It is always our goal to optimise your time and the learning experience. We develop complex lab exercises to enable you to master the topics taught in class. With this in mind we have organised the multivendor curriculum with a pre-requisite 2-day course and follow-on 3-day courses. This way you can pick the right courses based on your needs and time available.

FlexPod for VMware Design & Implementation (FPVI) 3 Days	FlexPod for VMware Administration (FPVA) 3 Days	Implementing Enhanced Secure Multi-tenancy Solutions (IESMT) 3 Days	VXI/VDI Design & Implementation (VXDI) 3 Days

# Architecture & Design for FlexPod (ADFP)

**ID** FL-ADFP **Price** 1.800,00 EUR / 1.536,00 GBP (excl. VAT) **Duration** 2 Days

Specifically designed for Cisco and NetApp Authorised Reseller partners who are planning to sell the FlexPod multi-vendor data center solution

## Prerequisites

Knowledge of at least one of the following before attending this course:

- NetApp storage technologies including high availability and MultiStore
- VMware vSphere
- Microsoft Hyper-V
- Cisco UCS Computing and Cisco Nexus Switching

## Course Content

Upon completion of this course, you will be able to meet the following objectives:

- Define FlexPod architecture
- Define the FlexPod architecture components
- Explain the benefits of FlexPod as an end-to-end solution
- Define the FlexPod key differentiators
- Identify key customer objections and how to respond

- Define key requirements for sizing FlexPod components
- Define the elements of the FlexPod Deployment Guide

# Implementing Virtualization Experience & Virtual Desktop Infrastructure (VXDI)

**ID** FL-VXDI **Price** 2.590,00 EUR (excl. VAT) **Duration** 3 Days

### Prerequisites

- FlexPod for VMware Essentials (FPVE) course
- CCNA certification or equivalent knowledge
- VMware vSphere: Install, Configure, Manage (VICM) course

### Course Content

- Desktop Virtualization Overview: Transformation of the Desktop; What is Desktop Virtualization
- Desktop Virtualization: VMware View; Citrix XenDesktop
- Storage Options: SCSI vs. FC vs. FCoE vs. iSCSI vs. NFS/CIFS; Cisco Storage Networking Products; Storage Virtualization; EMC Storage; Hitachi Storage
- Desktop Virtualization Endpoints: Desktop Virtualization Clients; VMware Client Functionality; Citrix Client Functionality
- Introduction to Cisco VXI: Cisco VXI Components; Implementing Desktop Virtualization

**ID** CI-SPNGN1 **Price** 2.590,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

### Prerequisites

- Basic computer literacy
- Basic Microsoft Windows navigation skills
- Basic Internet usage skills

### Course Content

- IP Fundamentals: Defining Functions of Networking; Introducing TCP/IP Layers and the OSI Reference Model; Managing IP Addressing; Describing the TCP/IP Transport Layer; Explaining Network Security; Explaining IP Addressing and Subnets
- Basic LAN Switching: Understanding Ethernet; Connecting to an Ethernet LAN; Using Switched LAN Technology; Operating a Cisco Switch; Understanding Switch Security; Performing Switched Network Optimizations; Troubleshooting Switch Issues
- Basic IP Routing: Exploring the Functions of Routing; Introducing the Cisco IOS XR; Configuring Basic Routing; Configuring EIGRP; Understanding Cisco Router Security
- Connectivity Technologies: Describing Access Technologies; Introducing Service Provider Access, Edge, and Transport Technologies; Enabling the WAN Internet Connection; Introducing Encapsulation; Introducing VPN
- Network Management and Security: Collecting Device Data; Configuring Network Management Tools; Using AAA

**ID** CI-SPNGN2 **Price** 2.590,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Building Cisco Service Provider Next-Generation Networks, Part 1 (SPNGN1) course

## Course Content

- Service Provider Network Construction: Introduction to Service Providers; Cisco IP NGN Architecture; Cisco Hardware Platform Placement
- Advanced LAN Switching: Implementing VLANs and Trunks; Spanning Tree Protocol Enhancements; Routing Between VLANs; First Hop Redundancy Protocols
- Internal Service Provider Traffic Forwarding: Link-State Routing

Protocols; Implementing OSPF; Implementing IS-IS; Implementing Route Redistribution; MPLS Basics

- External Service Provider Routing: Introducing BGP; Understanding BGP Path Attributes; Establishing BGP Sessions; Processing BGP Routes; Configuring Basic BGP
- ACLs and IP Address Translation: Applying Access Control Lists; Transitioning to IPv6
- Cisco IOS XE and Cisco IOS XR Software: Describing Cisco IOS XR Software Architecture and Features; Explaining Software Maintenance Operations on Cisco IOS XR and Cisco IOS XE; Explaining Configuration Management with Cisco IOS XR Software

**ID** CI-SPADVROUTE **Price** 2.990,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Deploying Cisco Service Provider Network Routing (SPROUTE) course

## Course Content

- Service Provider Connectivity with BGP: Defining Customer-to-Provider Connectivity Requirements; Connecting a Customer to a Service Provider
- Scale Service Provider Networks: Scaling BGP in Service Provider Networks; Introducing BGP Route Reflectors and Confederations
- Secure and Optimize BGP: Implementing Advanced BGP Operations;

Improving BGP Convergence; Improving BGP Configuration Scalability

- Multicast Overview: Introducing IP Multicast; Defining Multicast Distribution Trees and Forwarding; Multicast on the LAN; Populating the Mroute Table
- Intradomain and Interdomain Multicast Routing: Introducing the PIM-SM Protocol; Implementing PIM-SM Enhancements; Implementing Interdomain IP Multicast; Identifying Rendezvous Point Distribution Solutions
- Service Provider IPv6 Transition Implementations: Introducing IPv6 Services; Defining IPv6 Transition Mechanisms; Deploying IPv6 in the Service Provider Network

# Implementing Cisco Service Provider Next-Generation Core Network Services (SPCORE)

**ID** CI-SPCORE **Price** 2.990,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Intermediate to advanced knowledge of Cisco IOS, IOS XE, and Cisco IOS XR Software configuration
- Deploying Cisco Service Provider Advanced Network Routing (SPADVROUTE) course

## Course Content

- Multiprotocol Label Switching: Running Label Distribution Protocol; Implementing MPLS in the Service Provider Core
- MPLS Traffic Engineering: Introducing MPLS Traffic Engineering

Components; Running MPLS Traffic Engineering; Implementing MPLS TE; Protecting MPLS TE Traffic

- QoS in the Service Provider Network: Understanding QoS; Implementing Cisco QoS and QoS Mechanisms; Implementing MPLS Support for QoS
- QoS Classification and Marking: Understanding Classification and Marking; Using the Modular QoS CLI; Implementing Advanced QoS Techniques
- QoS Congestion Management and Avoidance: Managing Congestion; Implementing Congestion Avoidance
- QoS Traffic Policing and Shaping: Understanding Traffic Policing and Shaping; Implementing Traffic Policing; Implementing Traffic Shaping

# Implementing Cisco Service Provider Next-Generation Edge Network Services (SPEDGE)

**ID** CI-SPEDGE **Price** 2.990,00 EUR / 2.025,00 GBP (excl. VAT) **Duration** 5 Days

## Prerequisites

- Intermediate to advanced knowledge of Cisco IOS, IOS XE, and IOS XR Software configuration
- Implementing Cisco Service Provider Next-Generation Core Network Services (SPCORE) course

## Course Content

- VPN Technologies: Introducing VPNs; Introducing MPLS VPNs
- MPLS Layer 3 VPNs: Implementing MPLS Layer 3 VPN Backbones; Connecting Customers Using Simple Routing Protocols; Connecting Customers Using BGP or OSPF; Deploying IPv6 and MPLS

- Complex MPLS Layer 3 VPNs: Implementing Complex MPLS Layer 3 VPNs; Implementing Internet Access and MPLS Layer 3 VPNs; Introducing MPLS Interdomain Solutions
- Layer 2 VPNs and Ethernet Services: Introducing Layer 2 VPNs; Introducing AToM; Implementing VPLS

# About Fast Lane

## High-end Consulting and Education Services

We can help your company gain and develop all the technology skills it needs to rise to high-end challenges. After all, technology is the tool and only those who master it can capitalize on its benefits. Our customers and partners rely on us, and for very good reasons.

**Fast Lane provides the IT know-how you need.** Cloud computing, virtualisation and data center, voice, video and unified communications, security or wireless networking – whatever specialised insight, skills, and consulting you may need, Fast Lane has the right expert for you.

**Fast Lane is there for you in 60 countries across all continents.** Fast Lane experts train and advise major companies in all industries, leading service providers, and government agencies in twelve languages. Serving customers worldwide, Fast Lane head offices are sited in Berlin, Cary/NC, San Jose de Costa Rica, Ljubljana, St. Petersburg and Tokyo.

**Fast Lane is one of the leading Cisco Learning Partners worldwide.** The fastest growing Cisco Learning Partner, Fast Lane offers you the full Cisco training curriculum, from entry-level to specialised high-end courses, in all regions across the globe.

**Fast Lane is the only global NetApp Learning Partner.** An authorised NetApp training partner, Fast Lane offers original NetApp training programmes worldwide. NetApp-certified specialists with extensive storage experiences conduct the training.

**Fast Lane is the training provider of choice when it comes to virtualised data center solutions.** As an authorised training partner of Cisco, NetApp, VMware, and Symantec, we get you ready to rise to the challenges of planning and making the most of future-focused data center solutions.

**Fast Lane has developed courses of its own covering all key future technologies.** What's more, our offering comprises many other vendors and organisations' training programmes, for example, Brocade, CA, Check Point, Citrix, CompTIA, HP, ITIL®, LPI, Microsoft, Novell, Oracle, PRINCE2®, Red Hat, RSA Security, SAP, Symantec and Trend Micro.

**Fast Lane gives you access to a lab infrastructure unrivalled worldwide.** Fast Lane customers enjoy the use of training and demo labs for all areas of high-end networking. Equipped with the latest devices and technologies, our high-end labs provide first-rate service and raise the bar for training quality. Our project consultants can access these labs from any location.

**Fast Lane services satisfy the most discerning demands.** A comprehensive evaluation system ensures Fast Lane lives up to the most rigorous quality standards. With professional experience and excellent teaching skills, all our instructors and consultants transfer knowledge efficiently and effectively.

**Fast Lane employees' response is swift and courteous.** Rest assured you will always enjoy friendly, competent service and a quick response to your every request. For example, we can deploy troubleshooting experts within a few hours and organize on-site training including a coach, equipment, and course materials within 24 hours.
